

Castglo API Integration Status Report

1. Introduction

This report provides a comprehensive overview of the current status of API integration across the Castglo platform. All major modules have been audited and updated to move from static mock data to real-time interactions with the backend services at <https://castglo.onrender.com/api/v1>.

2. Completed Integrations (Fully Functional)

The following modules and pages are now fully functional and connected to live backend endpoints.

2.1 Authentication & User Management

- User Authentication:** Register, Sign-In, and Sign-Out flows for all roles (Talent, Casting Director, Industry Professional, Admin).
- Password Security:** "Forgot Password" and "Reset Password" workflows are active.
- Session Handling:** JWT-based authentication ensures persistent user sessions.

Test Credentials for Client Review

The following credentials can be used to test the platform's role-specific features:

Role	Email	Password
Admin	akoredesalaudeen54@gmail.com	12345678
Talent	dannyt@gmail.com	SecurePassword
Industry Professional	dannyip@gmail.com	SecurePassword
Casting Director	danny@gmail.com	SecurePassword

2.2 Public Discovery Experience

- Landing Page** ([Index \(https://castglo.vercel.app/\)](https://castglo.vercel.app/)): Live fetching of Featured Castings and Discoverable Talent.
- Talent Search** ([Browse \(https://castglo.vercel.app/browse\)](https://castglo.vercel.app/browse)): Real-time searching and filtering for talent profiles.
- Public Profiles** ([Talent Profile \(https://castglo.vercel.app/talent/example-id\)](https://castglo.vercel.app/talent/example-id)): Detailed public view of talent credentials, portfolio, and skills.
- Lead Capture** ([Contact \(https://castglo.vercel.app/contact\)](https://castglo.vercel.app/contact)): Direct contact form integration for business inquiries.

2.3 Dashboard Systems

- Admin Dashboard** ([Admin \(https://castglo.vercel.app/admin\)](https://castglo.vercel.app/admin)): Real-time platform analytics, user verification controls, and action logs.
- Talent Dashboard** ([Talent \(https://castglo.vercel.app/dashboard\)](https://castglo.vercel.app/dashboard)): Complete profile editing, headshot/showreel uploads, job browsing, and audition submission tracking.
- Director Dashboard** ([Director \(https://castglo.vercel.app/director\)](https://castglo.vercel.app/director)): Project creation, submission review, and applicant communication.
- Professional Dashboard** ([Professional \(https://castglo.vercel.app/professional\)](https://castglo.vercel.app/professional)): Service management and industry-specific discovery tools.

3. Pending Integrations & Roadblocks

The following items are currently using static data or placeholders and require additional backend infrastructure.

3.1 Specialized Features

- Virtual Auditions:** The "Instant Audition" feature requires a dedicated video-conferencing API integration (e.g., Twilio Video, Daily.co).
- Payments & Escrow:** Booking transactions are currently static, pending the live integration of a payment gateway (e.g., Stripe) and escrow logic.

3.2 Global Moderation

- Global Submissions View:** The administrative overview of all auditions across the platform is awaiting a centralized moderation API endpoint.

4. Technical Notes & Recommendations

- Domain Stability:** All API endpoints have been synchronized to the production domain castglo.onrender.com.
- Media Management:** We recommend implementing chunked uploads for larger video files (>50MB) to ensure system reliability during audition submissions.
- Email Verification:** A dedicated landing page for email token verification is recommended to complete the full security lifecycle.
