

Castglo – Pages That Require API Endpoints (Frontend)

Generated: 2026-06-02T14:23:28.971Z
export const API_BASE_URL = import.meta.env.VITE_API_BASE_URL || `https://castglo-qupm.onrender.com/api/v1`

Generated by code scanning. "Endpoints" are grouped by API wrapper (see src/lib/api.ts). Some routes are nested; if a route is shown as "(index route under parent)" it is an index route in App.tsx.

Page → Route → API Wrapper → Endpoint Group
