

Castglo Project Report

Executive Summary

In the last 48 hours, the platform has undergone a massive transformation, shifting from a standalone talent portal to a comprehensive ****Professional Casting & Industry Marketplace****. We have successfully standardized the profiles of industry professionals (Photographers, MUAs, Coaches) and implemented advanced director-level casting management tools.

1. Director & Agency Casting Suite

Casting Management Evolution

- **Team & Collaborators:** Managed invite-based system for production teams with role-based permissions (Admin, Editor, Viewer).
- **Unified Roles Inventory:** Centralized tracking of all character roles across every production, including matching algorithm integration.
- **Applicant Lifecycle ATS:** Enhanced Kanban pipeline with customizable folder management (e.g., "Shortlist", "Finalists", "Backup").
- **Billing marketplace:** Subscription hub and one-off project promotions (Featured Listing, Urgent Hiring, Social Blasts).

2. Industry Professional Profile Overhaul

Professional Branding & Marketplace

- **Brand Identity:** High-impact "Business Name" display and split-bio system (Elevator pitch vs. Detailed history).
- **Complex Pricing Models:** Support for Hourly, Daily, Fixed, Package, and Custom Quote services.
- **Industry-Dynamic Data:** specialized fields for Equipment Specs (Photographer), Kit Brands (MUA), and Delivery Modes (Coach).
- **Business Operations:** Visibility for Studio Access, Insurance Availability, and NDA compliance status.
- **Work Availability:** Integrated booking lead times and selectable working day preferences.

3. Security & Account Infrastructure

Verification & Protection Logic

- **Verification Guardrails:** Strict `ProtectedRoute` logic enforcing `isVerified` status for professional tools.
- **Account Lifecycle Routing:** automated handling of "Verification Process" and "Verification Pending" states for seamless onboarding.
